A Website against racism and rage

1.Introduction

- The idea consists in build a place where people who felt offended can publish your cases. The goal is to become a place where the pain of racism and rage crimes can be public with the intuit of conscientization and education.
- This website wants to become a tool for all brown and black people can unburden and at the same time report the injustice.

2.Expected List of Features

- Super - interactive interface
- Focus on the UI/UX
- Form with text input

    This website must be an artistic experience, so it will be necessary a good built UI/UX design.

3.Market Survey
- Facebook and other social media are used as this space that we want to build, however, they are very polluted information, and this does not make the cases have the deserved prominence.
